To,

**Shri. Narendra Modi Ji,**

*Hon'ble Prime Minister of India*

*7, Lok Kalyan Marg, New Delhi - 110011*

Sub: Creation of a **Road User ID card to Save Millions of lives**

Respected Sir,

India leads the world in Road traffic injuries and an injury leaves a permanent scar not only on the body but also on the psyche of an individual.

Our organization has come up with a Road User ID card which is meant for all, irrespective of drivers, pedestrian users, young and old. We would be well pleased if this card could become a gift to the people of India, as the details contained in the card will ensure that the time to alert health systems during an injury is reduced and the process further eased out containing all essential details where good Samaritans and volunteers can assist to fast track and stabilize the patient and their relative.

We solicit your intervention to execute the same under the Government of India. Attached is the card sample and the media article.

Looking forward to your response and if you feel we could discuss this further, it would be my pleasure to brief you on this regard in person.

Warm Regards,

**Dr.Edmond Fernandes**, MBBS, MD, PDG-PHSM
