*For a Nation to Rejoice*

Dated: 18<sup>th</sup> November, 2015

To,  
Shri J T Radhakrishna,  
Airport Director, Mangaluru International Airport

Sub: Suggestions and observations

Respected Sir,

1. I am a frequent traveller from Mangalore sector which you lead, and at the outset, let me congratulate you for the many awards you have recently received, which makes us all equally proud.
2. I would like to draw your attention towards the following which would bring an altogether different perspective for air travellers, entering and exiting Mangaluru. As follows
  - Initiate a **flight tracking application** so that the passenger relatives waiting for the arrival of the flights can keep track of the exact time of arrival.
  - Auto service should be regularized to reach down to kenjar from the airport. Or alternately, **3-4 Campus Van** can be brought by the airport itself which can bring the passengers down-hill and up-hill. This would avoid congestion and would also help passengers who aim to travel economical.
  - **KIOSK machines** remain absent, having a few would not be a bad idea.
  - **Sleeping PODS** for travellers should be initiated envisioning the future air traffic.
  - **Wifi system** should be provided throughout
  - **Bus services** every one hour interval can be considered.

With best regards,

Yours sincerely,

Dr Edmond Fernandes

Note: All letters coming from the Office of Dr Edmond, will be available on public domain on [www.edmond.in](http://www.edmond.in) for all citizens to track and follow.
